

Print, cut up, and leave copies lying around in coffee shops, on the bus, in the break room, any public place!

FAIR TAXES !

Could cut your taxes in half!!

Should the world's third richest man pay taxes that amounts to 2% of his net worth, while a single, minimum-wage worker pays taxes that amounts to 600% of her net worth?

Should a millionaire couple pay total taxes that are 20% of their income and investment gain while a middle class couple pays almost 40%?

Should we have a tax system that discourages social mobility, because for example young working-class families can't afford to send their smart, hard-working teenager to college?

Should 10% of our federal tax dollars go toward paying interest (27% to other countries) on our national debt rather than toward projects that would improve our own economy and help our own citizens?

Should the tax system be designed to encourage the formation of investment bubbles, which lead to investment busts, recessions, lost jobs, lost homes, and lost retirement accounts?
